

EXPLORATORY WELLS Z-1, Z-2, Z-3

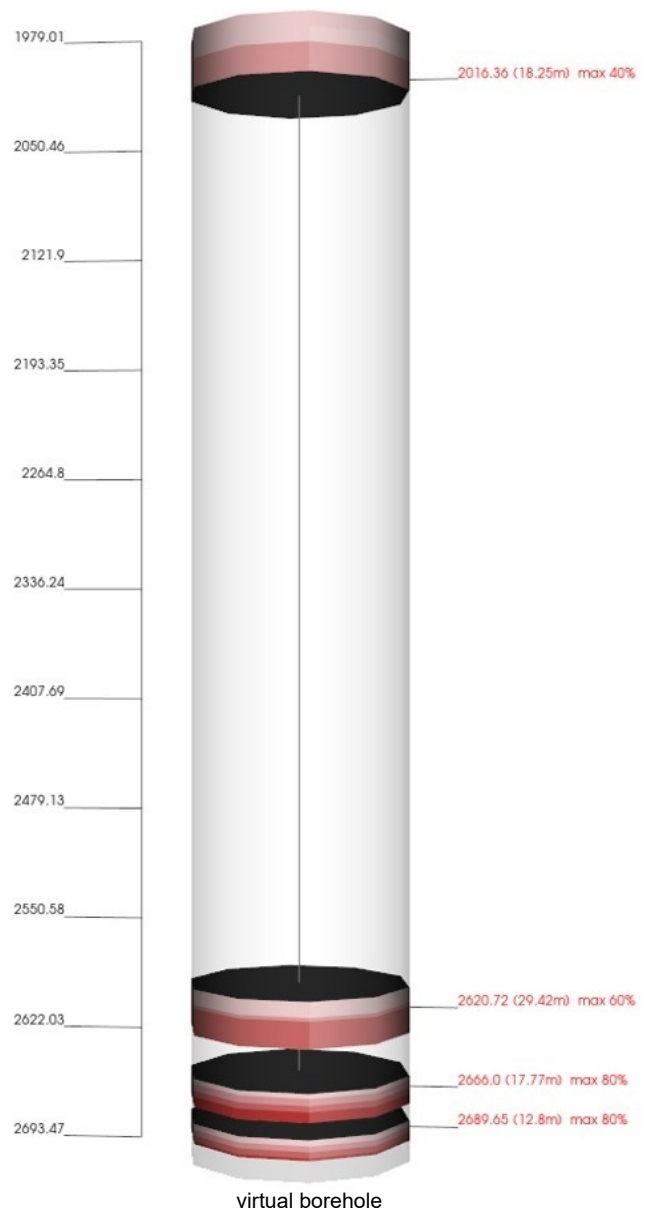

Frequency Resonance Remote Scanning for Oil Content

The cross section shows the depths of the oil layers, their thickness and relative oil content in % within each oil layer.

Z-1 CROSS SECTION

Satellite image of the explored area, with the position of scanned well Z-1 marked by a red dot. No oil signals were received from the adjacent exploratory wells Z-2 and Z-3 (dry wells).

We provide survey results utilizing advanced instruments and technology, based on satellite image processing and electromagnetic field resonance analysis inspired by Nikola Tesla's research.
